What if my mentor cheats?

An analysis of the 'Double Bind Dilemma' college students encounter when facing professorial academic misconduct in China

如果我的导师学术造假会怎么样?

对大学生在教授学术不端时所处的"双面困境的分析

Introduction

Section 1

开头的对学术不端的介绍

Academic misconducts has existed in .....for....years.
(definition of academic misconducts---it refers to...)

Section 2

大多数对于学术不端的研究主体都是学生，很少有对教授学术不端的影响的研究

Mostly the discussion are surround "college students", but few examined the situations of students when their professor cheats

Section 3

教授出现学术不端的问题，对学生有什么影响?

在高等教育中，教授的性格，品行，无疑会给学生带来巨大的影响

Evidence 1

(教授对学生学业以及生活方面的影响)

The influence of a professor on Chinese students' college life can be significant, impacting v**arious aspects of their academic journey and well-being**. Research by Li and Wang underscores the importance of the teacher-student relationship in shaping **college students' academic achievement**. Positive relationships with professors can enhance students' learning experiences and

outcomes. Additionally, **Zhang highlight the crucial role of teacher support in promoting students' well-being, with basic psychological needs satisfaction mediating this relationship**.

Source of evidence：

Li, X., & Wang, Y. (2019). The Impact of Teacher-Student Relationship on College Students' Academic Achievement. Frontiers in Psychology, 10, 1698. doi:10.3389/fpsyg.2019.01698

Zhang, J., & Zhang, Y. (2020). The Influence of Teacher Support on College Students' Well-Being: The Mediating Role of Basic Psychological Needs Satisfaction. Frontiers in Psychology, 11, 573. doi:10.3389/fpsyg.2020.00573

Evidence 2

（教授在学生眼里所扮演的角色）

The influence of professors on students is significant, with faculty members acting as **moral anchors or role models** that can positively impact students decision not to cheat(Ma,2011)

Ma, Z. (2011). Business students' cheating in classroom and their propensity to cheat in the real world: a study of ethicality and practicality in china. Asian Journal of Business Ethics, 2(1), 65-78. https://doi.org/10.1007/s13520-011-0012-2

Section 4

（阐述问题的阶段）

Evidence 1 （新闻引入 学生自己对事物的感受）

On January 16, 11 students from Huazhong Agricultural University published a report and accused a professor surnamed Huang of academic misconduct, including **fabricating research papers, falsifying textbook content, and suppressing students.** The report, consisting of 125 pages, has attracted widespread attention.

Student's self-reports：

"I went to pursue my graduate studies, but now I feel extremely distressed," said a student who was one of the people to report the issue, according to a report by cnr.cn on Thursday.

University teacher in C.China suspended for academic misconduct following students' report , By Global Times ,Published: Jan 19, 2024 03:20 PM
https://www.globaltimes.cn/page/202401/1305719.shtml

Evidence 2 （研究者的论述）

When a professor engages in cheating, the impact on students can be profound and multifaceted. Research by Eriksson & McGee (2015) suggests that **academic dishonesty can put non-cheating students at a potential academic disadvantage** compared to those who engage in cheating. This disparity in academic performance can create an unfair learning environment and erode the trust and integrity of the educational system.

Eriksson, L. and McGee, T. R. (2015). Academic dishonesty amongst australian criminal justice and policing university students: individual and contextual factors. International Journal for Educational Integrity, 11(1). https://doi.org/10.1007/s40979-015-0005-3

Section 5

引出 research question--学生在此情况之下的两难困境

When students encounter a professor engaging in academic cheating, they are often caught in a difficult situation where reporting the misconduct can have repercussions, while staying silent may perpetuate unethical behavior.

Body paragraph 1 对于学生而言（不反抗的困境）

学生不反抗困境 1 (对于学生本身可能会遭受的对待)

教授对学生的欺凌行为

Part 1（数据证明情况属实，还十分普遍）

In a study on college students, approximately **half reported witnessing professor/instructor bullying, with 18% reporting being bullied by a professor/instructor** (Marraccini et al., 2015).

Marraccini, M. E., Weyandt, L. L., & Rossi, J. S. (2015). College students' perceptions of professor/instructor bullying: questionnaire development and psychometric properties. Journal of American College Health, 63(8), 563-572. https://doi.org/10.1080/07448481.2015.1060596

Part 2（欺凌的行为具体化）

Furthermore, a qualitative study on medical students revealed experiences of **humiliation, belittlement, insults, criticism, shouting**, and indecent comments by their lecturers (Makowska & Wyleżałek, 2021).

Makowska, M. and Wyleżałek, J. (2021). A qualitative study of the mistreatment of medical students by their lecturers in polish medical schools. International Journal of Environmental Research and Public Health, 18(23), 12271. https://doi.org/10.3390/ijerph182312271

Part 3（可能给学生带来的心理影响）

Lecturer bullying has been linked to **negative psychosocial and behavioral outcomes** for students, such as **loss of trust, feelings of hopelessness, depression, oppositional behavior, and increased fighting among peers** (Mbada et al., 2020).

Mbada, C. E., Ogunseun, I. P., Fasuyi, F. O., Adegbemigun, O. D., Fatoye, C., Idowu, O. A., … & Fatoye, F. (2020). Prevalence and correlates of bullying in physiotherapy education in nigeria.. https://doi.org/10.21203/rs.2.21959/v1

学生不反抗困境 2 --对于整个学术界可能会带来的影响

Real World examples

Part 1(介绍事情的大概)

On July 21, 2022, the prominent blog Retraction Watch1 and esteemed American journal Science2 published articles on the newly uncovered evidence of potential academic misconduct in Alzheimer's disease (AD) research, introducing the controversy to a large audience. The controversies were revealed in part by the image analyses of Dr. Matthew Schrag of Vanderbilt University.

David Burbridge
Aug 05, 2022 Image fabrication controversy in Alzheimer's research threatens a fundamental hypothesis
https://www.editage.com/insights/image-fabrication-controversy-in-alzheimers-research-threatens-a-fundamental-hypothesis

Part 2（Science 发表了一篇详细的关于这个事件的经过，讲述了 academic misconduct 发生在光天化日之下，却没有被举报的完整过程）

BLOTS ON A FIELD?
A neuroscience image sleuth finds signs of fabrication in scores of Alzheimer's articles, threatening a reigning theory of the disease 21 JUL 20222:03 PM ETBYCHARLES PILLER
https://www.science.org/content/article/potential-fabrication-research-images-threatens-key-theory-alzheimers-disease

In August 2021, Matthew Schrag, a **neuroscientist and physician at Vanderbilt University, got a call that would plunge him into a maelstrom of possible scientific misconduct**. A colleague wanted to connect him with an attorney investigating an experimental drug for Alzheimer's disease called Simufilam.

A **6-month investigation** by Science provided strong support for Schrag's suspicions and raised questions about Lesné's research.

They concurred with his overall conclusions, which cast **doubt on hundreds of images, including more than 70 in Lesné's papers**. Some look like "shockingly blatant" examples of image tampering, says Donna Wilcock, an Alzheimer's expert at the University of Kentucky.

The authors "appeared to have composed figures by piecing together parts of photos from different experiments," says Elisabeth Bik, a molecular biologist and well-known forensic image consultant. "The obtained experimental results might not have been the desired results, and that data might have been changed to … better fit a hypothesis."

In the 16 years following the landmark paper, Lesné and Ashe—separately or jointly—published many articles on their stellar oligomer. Yet only a handful of other groups have reported detecting Aβ*56.

> **You can't cheat to cure a disease. Biology doesn't care.**
>
> MATTHEW SCHRAG | VANDERBILT UNIVERSITY

As federal agencies, universities, and journals quietly investigate Schrag's concerns, **he decided to try to speed up the process** by providing his findings to Science. He knows the move could have **personal consequences**. By calling out powerful agencies, journals, and scientists, Schrag might jeopardize grants and publications essential to his success.

But he says **he felt an urgent need to go public about work that might mislead the field and slow the race to save lives. "You can cheat to get a paper. You can cheat to get a degree. You can cheat to get a grant. You can't cheat to cure a disease,"** he says. "Biology doesn't care."

对于学生而言（反抗的困境）

学生反抗的困境 1--Academic performance & Graduation

Part 1

Evidence 1 -- 对于本科生

在工程学院，教授对大学生 academic performance 的直接影响

Research Vogt (2008) on faculty as **a critical factor in student retention and performance in engineering programs** underscores the significance of faculty-student relationships in academic achievement. Conflicts between students and professors may impact students' **self-efficacy, academic confidence, and overall performance.**

Vogt, C. (2008). Faculty as a critical juncture in student retention and performance in engineering programs. Journal of Engineering Education, 97(1), 27-36. https://doi.org/10.1002/j.2168-9830.2008.tb00951.x

Evidence 2 --对于研究生

大多数研究生认为他们和导师的关系是他们能否顺利毕业的关键

Indeed, many graduate students have identified their relationships with **faculty mentors as one of the most important aspects** in their **completion of and satisfaction with graduate school** (Hayes & Koro-Ljungberg, 2014).

Hayes, S. and Koro-Ljungberg, M. (2014). Dialogic exchanges and the negotiation of differences: female graduate students' experiences of obstacles related to academic mentoring. The Qualitative Report. https://doi.org/10.46743/2160-3715/2011.1083

Evidence 3 --对于博士生

在医学院，博士生和导师的关系与他们能否顺利的毕业有直接关联

Doctoral students are more likely to **persist to graduation** and **report higher degrees** of satisfaction with their program when they **engage in a meaningful relationship with a faculty mentor or advisor** (Holley & Caldwell, 2011).

Holley, K. A. and Caldwell, M. L. (2011). The challenges of designing and implementing a doctoral student mentoring program. Innovative Higher Education, 37(3), 243-253. https://doi.org/10.1007/s10755-011-9203-y
